INTERMEDIATE iOS - 121

ENGR 101
July 9–13, 2018
9:00–10:15 pm

WELCOME

Intermediate iOS is for anyone who has an iPhone, iPad or iPod touch. This class will take your iOS knowledge to the next level as we look at more advanced features. Every year, Apple comes out with a new operating system for these devices, so we will look at some of the major changes in iOS 11. We will look at advanced settings to help you personalize your device, and help you understand iCloud and some alternatives. We'll look at connecting your device to your computer, where you can speedily manage your content and save space on your device. Come prepared to learn about your iOS device.

NOTE: Since all technology has a shelf life, not all features will be available on all devices. With older devices, fewer features will be available. It is recommended that you have either an iPhone 5s or newer and/or iPad Mini 2/iPad Air or newer.

What you should do before class:

There are a few things that will be helpful to you and to me before you come to class.

1. Make sure you are connected to the internet at the University. You do this by connecting to Bluezone, and going to bluezone.usu.edu and following the steps there. If you need help connecting to the internet, you can get help from the YETC or the IT Service Desk.
2. Make sure that you know your Apple ID and Password. You may find that you use it frequently during the class.
3. Friday will be a class choice day. The earlier you let me know what you would like to learn, the more time I will have to prepare.
4. Come prepared to learn.

Rules:

1. Turn your phones on silent or Do Not Disturb. We all will need to have our phones out, but they should not be distracting to others who are learning.
2. Be courteous to everyone around you, and do not speak out of turn. It distracts others from getting the most out of the class time.

Course Website:

For the course slides, please visit the course website: http://ios.nathanblaylock.com/ or http://www.nathanblaylock.com/ios-class/ (both will take you to the same page).
